Summary

A final-year computer science student at pakuan university with a strong focus on software engineering and fullstack web development. experienced in designing modern system architectures using next.js, rest api integration, and relational database management (postgresql). possesses a solid foundation in object-oriented programming (oop) through android development (kotlin/java), with additional strengths in designing user-centered interfaces (ui/ux). currently researching artificial intelligence implementation (python) for the final project, demonstrating a high level of analytical problem-solving skills.

Language

- Bahasa Indonesia (Native)
- English (Professional Working Proficiency).

Skills

Web Development
- Next.js
- React.js
- JavaScript
- TypeScript
- HTML
- CSS
- Tailwind.

Tools & Version Control
- Git
- GitHub
- Vercel
- Node.js.

Design & Prototyping
- Figma
- UI/UX Principles
- Wireframing.

Backend & Database
- REST API Integration
- Prisma ORM
- PostgreSQL (Supabase)
- MySQL.

Programming Concepts
- Object-Oriented Programming (OOP)
- MVC Architecture
- System Analysis.

CERTIFICATIONS & TRAINING

Intermediate Android Developer (Kotlin) ▪ Building applications with an OOP foundation, API integration, and a local database	*Dicoding Academy (10/2024)*
Fundamental & Beginner Android Developer	*Dicoding Academy.(12/2024)*
E-Commerce Website Development (WordPress/CMS)	*PAKAR (12/2022).*

Professional Experience

Freelance Fullstack Web Developer *(Independent Client Project)*	***12/2025 - 2/2026***
▪ Developing and launching a commercial web application end-to-end using the Next.js and React ecosystem. ▪ Conducting client requirement analysis, designing system architecture, and executing deployment to the production environment (Vercel). ▪ Successfully delivering the project on time with a professional contract value, ensuring optimal application performance and security.	
Fullstack E-Commerce Development *(Personal Engineering Project)*	**2/2026 - until now**
• Building a dynamic e-commerce platform using Next.js App Router with high loading performance (SSR/SSG). • Implementing relational database management using Prisma Client and Supabase (PostgreSQL) for authentication features (NextAuth) and CRUD (Create, Read, Update, Delete) operations on products. • Integrating third-party payment gateways (Midtrans API) to process transactions in real-time and securely.	
UI/UX Designer *(Freedom Leisure)*	**1/2024 – 1/2026**
▪ Translating business needs into interactive prototypes and wireframes (Figma, Adobe Suite) to ensure a logical user experience (UX) before entering the development phase. ▪ Quickly adapt to Agile methodology, bridging effective visual communication to support software solutions.
